NIPPON COLUMBIA CO., LTD.

IMPORTANT TO SAFETY

WARNING:

TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION:

1. Handle the power supply cord carefully. Do not damage or deform the power supply cord. If it is damaged or deformed, it may cause electric shock or malfunction when used. When removing from wall outlet, be sure to remove by holding the plug attachment and not by pulling the cord.
2. Do not open the top cover. In order to prevent electric shock, do not open the top cover. If problems occur, contact your DENON DEALER.
3. Do not place anything inside. Do not place metal objects or spill liquid inside the D/A Converter. Electric shock or malfunction may result.

Please record and retain the Model name and serial number of your set shown on this rating label.

Model No. DA-S1

Serial No. _____

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

CAUTION:

USE OF CONTROLS OR ADJUSTMENTS OR REFORMATION OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

THE D/A CONVERTER SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT PROPERLY QUALIFIED SERVICE PERSONNEL.

NOTE:

This unit may cause interference to radio and television reception if you do not operate it in strict accordance with this OPERATING INSTRUCTIONS.

This unit complies with Class B computing device rules in accordance with the specifications in Subpart J or Part 15 of the FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. If the unit does cause interference to any radio or television reception, try to reduce it by one or more of the following means:

- a) Turn the other unit to improve reception.
- b) Move this unit.
- c) Move this unit away from others.
- d) Plug this unit respectively into a different AC outlet.

* This is note in accordance with Section 15.828 of the FCC Rules.

IMPORTANT (BRITISH MODEL ONLY)

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral Brown: Live

The colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

SAFETY INSTRUCTIONS

1. Read Instructions - All the safety and operating instructions should be read before the appliance is operated.
2. Retain Instructions - The safety and operating instructions should be retained for future reference.
3. Heed Warnings - All warnings on the appliance and in the operating instructions should be adhered to.
4. Follow Instructions - All operating and use instructions should be followed.
5. Water and Moisture - The appliance should not be used near water - for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.
6. Carts and Stands - The appliance should be used only with a cart or stand that is recommended by the manufacturer.
- 6A. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
7. Wall or Ceiling Mounting - The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
8. Ventilation - The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
9. Heat - The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
10. Power Sources - The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.
11. Grounding or Polarization - Precautions should be taken so that the grounding or polarization means of an appliance is not defeated.
12. Power Cord Protection - Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
14. Cleaning - The appliance should be cleaned only as recommended by the manufacturer.
15. Power Lines - An outdoor antenna should be located away from power lines.
16. Outdoor Antenna Grounding - If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna-discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
17. Unused Periods - The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
18. Object and Liquid Entry - Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.
19. Damage Requiring Service - The appliance should be serviced by qualified service personnel when:
 - A. The power supply cord or the plug has been damaged, or
 - B. Objects have fallen, or liquid has been spilled into the appliance; or
 - C. The appliance has been exposed to rain; or
 - D. The appliance does not appear to operate normally or exhibits a marked change in performance; or
 - E. The appliance has been dropped, or the enclosure damaged.
20. Servicing - The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

NOTE ON USE/OBSERVATIONS RELATIVES A L'UTILISATION/NOTAS SOBRE EL USO

 • Avoid high temperatures. Allow for sufficient heat dispersion when installed on a rack. • Eviter des températures élevées. Tenir compte d'une dispersion de chaleur suffisante lors de l'installation sur une étagère. • Evite altas temperaturas. Permita la suficiente dispersión del calor cuando está instalado en la consola.	 • Keep the set free from moisture, water, and dust. • Protéger l'appareil contre l'humidité, l'eau et la poussière. • Mantenga el equipo libre de humedad, agua y polvo.	 • Do not let foreign objects in the set. • Ne pas laisser des objets étrangers dans l'appareil. • No deje objetos extraños dentro del equipo.
 • Handle the power cord carefully. Hold the plug when unplugging the cord. • Manipuler le cordon d'alimentation avec précaution. Tenir la prise lors du débranchement du cordon. • Maneje el cordón de energía con cuidado. Sostenga el enchufe cuando desconecte el cordón de energía.	 • Unplug the power cord when not using the set for long periods of time. • Débrancher le cordon d'alimentation lorsque l'appareil n'est pas utilisé pendant de longues périodes. • Desconecte el cordón de energía cuando no utilice el equipo por mucho tiempo.	 • Do not let insecticides, benzene, and thinner come in contact with the set. • Ne pas mettre en contact des insecticides, du benzène et un diluant avec l'appareil. • No permita el contacto de insectidas, gasolina y diluyentes con el equipo.
 • Handle the power cord carefully. Hold the plug when unplugging the cord. • Manipuler le cordon d'alimentation avec précaution. Tenir la prise lors du débranchement du cordon. • Maneje el cordón de energía con cuidado. Sostenga el enchufe cuando desconecte el cordón de energía.	 *(For sets with ventilation holes) • Do not obstruct the ventilation holes. • Ne pas obstruer les trous d'aération. • No obstruya los orificios de ventilación.	 • Never disassemble or modify the set in any way. • Ne jamais démonter ou modifier l'appareil d'une manière ou d'une autre. • Nunca desarme o modifique el equipo de ninguna manera.

We greatly appreciate your purchase of this Denon product. To ensure that you take fullest advantage of your D/A converter, read these instructions carefully before using the unit and be sure to always operate it properly. After reading these instructions, be sure to keep them for future reference should questions or problems arise.

SPECIFICATIONS	16

Please check to make sure the following items are included with the main unit in the carton:

- (1) Operating Instructions
- (2) Connection Cord

IMPORTANT (CANADIAN MODEL ONLY)

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communication.

• Line Voltage Selection (for multiple voltage models only)

- Be sure to check that the voltage selector on the rear panel is set to the proper voltage.
- If not, contact your store of purchase.
- Never remove screws or try to switch the voltage selector on your own.

• FOR U.S.A. & CANADA MODEL ONLY

CAUTION

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

• POUR LES MODELES AMERICAINS ET CANADIENS UNIQUEMENT

ATTENTION

POUR PREVENIR LES CHOCS ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT, SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT.

FEATURES

The DA-S1 is a D/A converter using a newly developed ALPHA (Adaptive Line Pattern Harmonized Algorithm) processor to provide the ultimate waveform reproduction and in particular faithful reproduction of the original sound at low levels. It achieves high performance and faithful musical expression with no fold back noise within the audible range and ideal infinite impulse response thanks to specially selected DACs, a non-feedback buffer amplifier, totally separated digital and analog circuitry, and a strong power supply. The DA-S1 is equipped with synchronized driving and five different types of digital inputs.

(1) Ultimate signal reproduction using a newly developed ALPHA processor

1. High speed interpolation by the newly developed ALPHA processor recreates the data below the LSB (least significant bit) lost upon recording to provide smooth waveform reproduction.
2. The original signals, including such unusual waveforms as impulse response, can also be reproduced with no ringing.
3. The effects of ALPHA processing are particularly noticeable at low levels, such as when music gently fades out or gradually emerges from total silence.

(2) High precision D/A converters

1. The highly acclaimed 20-bit Super Linear Converter is used to provide unrivaled linearity at low levels.
2. The D/A converters are special version 20-bit D/A converters carefully selected to meet high standards for linearity, S/N ratio and elimination of distortion.
3. Distortion and S/N ratio are further improved through differential operation of two D/A converters per channel.

(3) Synchronized driving with an ultra high speed synchronized optical link (ST-GEN LOCK)

1. The speed at which data transfer is a very rapid 50Mbit/sec, nearly 10 times that of conventional optical links (6Mbit/sec). This virtually eliminates transmission distortion due to signal delay (jitter).
2. The D/A converter master clock is synchronized with the CD Transport clock, improving clock precision and suppressing jitter.
3. The AT&T ST-Link™ system is used for the interface, allowing direct one-way connection to a CD Transport with an ST-Link™ output jack.

(4) High precision digital filter

1. The DA-S1 uses a high performance 20-bit input digital filter of the type used for professional recording.
2. Suppression is 117 dB or less at no-pass range, rivaling the highest suppression in the world.
3. The residual ripple is ± 0.00002 dB at pass range, also rivaling the highest in the world.

(5) Pure non-feedback buffer amplifier

1. A pure non-feedback amplifier is used after I/V (current/voltage) conversion. The discrete DC servo coupling achieves provide a high-speed, low-impedance output. Signals are transmitted to the line outputs with no deterioration of the D/A converter's amazingly low S/N ratio and distortion.
2. XLR (gold plated) balanced outputs for little sound quality deterioration are provided in addition to RCA pin-plug jacks.

(6) Totally separated digital and analog circuitry

1. The digital and analog circuitry are totally separated with ultra high-speed photocouplers on all signal lines.
2. The digital and analog circuits each have their own dedicated power transformer and power supply circuit.
3. Completely separated left and right channels ensure negligible mutual interference.
4. The digital circuitry is shielded to protect it from high frequency noise.

NAMES AND FUNCTIONS OF PARTS

① Power Switch (POWER)

- Press this to turn on the power of the DA-S1.

② Input Selector Switches (CH 1 to CH 5)

- Use these switches to select one of the digital signal input jacks on the rear panel (②, ③, ④, ⑤, ⑥ or ⑦).
- The corresponding LED (light emitting diode) lights
- Two systems each can be connected to channels 2 and 3 (CH 2 and CH 3). Use switches ⑥ and ⑦ on the back panel to select the optical input (OPTICAL-TOS) or the coaxial input (COAXIAL-RCA).

③ Phase Inverter Switch

- Press this to invert the phase of the output signals from output jacks ⑧ and ⑨.
- The LED (light emitting diode) lights when the inverted output mode is selected.

④ Sampling Frequency Indicators

- Digital audio signals with three different sampling frequencies (32 kHz, 44.1 kHz and 48 kHz) can be connected to the DA-S1's digital inputs.
- The LED (light emitting diode) for the sampling frequency of the digital audio signals connected to the channel selected with the input selector switches lights.

NOTE:

The input selector switch and the phase inverter switch position set when the power is turned off are stored in the memory, so the same input selector switch and phase inverter switch position are automatically set when the power is turned back on.

- 5 Analog Output Jacks [BALANCE]**
(Canon XLR-3-32 type)
- Use these jacks for connection to the amplifier's balanced input jacks (600 ohm input impedance).

- 6 Analog Output Jacks [UNBALANCE]**
(Coaxial RCA)
- Use these jacks for connection to the amplifier's input jacks.

- 7 Digital Input Jack - (CH-1)**
(OPTICAL-ST)
- This is a digital input jack for connection of an ST-Link™ optical fiber cable.
 - This input jack is selected when the channel 1 (CH-1) input selector switch on the front panel is selected.

- 8 Digital Input Jack - (CH-2)**
(OPTICAL-TOS)
- This is a digital input jack for connection of an optical fiber cable.
 - This input jack is selected when the channel 2 (CH-2) input selector switch is set to the OPTICAL-TOS position and the channel 2 (CH-2) input selector switch on the front panel is selected.

- 9 Digital Input Jack - (CH-2)**
(COAXIAL-RCA)
- This is a digital input jack for connecting a 75 ohm RCA pin-plug cord.
 - This input jack is selected when the channel 2 (CH-2) input selector switch is set to the COAXIAL-RCA position and the channel 2 (CH-2) input selector switch on the front panel is selected.

- 10 Input Selector Switch - (CH-2)**
(OPTICAL / COAXIAL)
- Use this switch to select the digital inputs connected to input jacks 7 and 9.

- 11 Digital Input Jack - (CH-3)**
(OPTICAL-TOS)
- This input jack is selected when the channel 3 (CH-3) input selector switch is set to the OPTICAL-TOS position and the channel 3 (CH-3) input selector switch on the front panel is selected. This jack is of the same type as input jack 7.

- 12 Digital Input Jack - (CH-3)**
(COAXIAL-RCA)
- This input jack is selected when the channel 3 (CH-3) input selector switch is set to the COAXIAL-RCA position and the channel 3 (CH-3) input selector switch on the front panel is selected. This jack is of the same type as input jack 9.

- 13 Input Selector Switch - (CH-3)**
(OPTICAL / COAXIAL)
- Use this switch to select the digital inputs connected to input jacks 11 and 12.

- 14 Digital Input Jack - (CH-4)**
(COAXIAL-BNC)
- This is a digital input jack for connection of a coaxial cord with BNC type connectors.
 - This input jack is selected when the channel 4 (CH-4) input selector switch on the front panel is selected.

- 15 Digital Input Jack - (CH-5)**
(BALANCE)
- This is a digital input jack for connection of a Canon connector (XLR type) cord.
 - This input jack is selected when the channel 5 (CH-5) input selector switch on the front panel is selected.

- 16 Digital Output Jack**
(OPTICAL-TOS)
- Digital data is output in optical form from this jack.
 - The digital data input to the digital input jack selected with the input selector switches on the front panel (CH-1 to CH-5) is output from this jack.
 - Optical fiber cables can be connected to this jack.

- 17 Digital Output Jack**
(COAXIAL-RCA)
- Digital data is output from this jack.
 - The digital data input to the digital input jack selected with the input selector switches on the front panel (CH-1 to CH-5) is output from this jack.
 - 75 ohm RCA pin plug cords can be connected to this jack.

- 18 Synchronizing Clock Output Jack**
(GEN LOCK CLOCK OUTPUT-ST)
- This is the clock output jack for synchronized driving of the separately sold DP-S1 CD Transport.
 - Use an ST-Link™ optical fiber cable (same as jack 7) for connection of this jack.
 - ST-Link™ is a registered trademark of AT&T.

- 19 Input Signal Precision Selector Switch**
(ST-GEN LOCK / LEVEL-1 / LEVEL-II)
- Use this switch to select the digital input level conforming to digital audio interface specifications LEVEL-I or LEVEL-II, or the position for Denon's own synchronized driving.
 - Set this switch to LEVEL-II for normal digital inputs.
 - When components equipped with high precision digital output in the LEVEL-I mode are connected, set this switch to LEVEL-I for high precision data transmission with little jitter.
 - For synchronized driving with the separately sold DP-S1 CD Transport, connect the ST-Link™ optical fiber cable to jack 18, connect a cable to one of the digital input jacks (CH-1 to CH-5), then set this switch to the ST-GEN LOCK mode for data transmission with optimum precision.

NOTE:

Noise may be produced unless two-way connections for synchronized driving are made when this switch is set to the ST-GEN LOCK mode. Only set this switch to the ST-GEN LOCK mode when connections are made for synchronized driving.

CONNECTIONS

Always turn the power of all components off when making connections.

Output Jack Connections

1 Analog Output Jacks (UNBALANCE)

- Connect as shown on the diagram using the included RCA pin-plug cords.
- Use the amplifier's [CD], [AUX] or [TAPE PLAY] input jacks.
- Use the red-lined pin-plug cord for the right channel, the white-lined pin-plug cord for the left channel.

2 Analog Output Jacks (BALANCE)

- Connect as shown on the diagram using a Canon connector (XLR type) cord, available in stores.
- Canon connector signal layout

1. Common
2. Cold
3. Hot

NOTE:

Do not short circuit the hot or cold terminal with the common terminal.

3 Digital Output Jack (OPTICAL-TOS)

- Connect as shown on the diagram using an optical fiber cable, available in stores.
- The jack includes a cap. Remove the cap, then insert the cord securely so that it is locked.

4 Digital Output Jack (COAXIAL-RCA)

- Connect as shown on the diagram using a coaxial 75 ohm RCA pin-plug cord, available in stores.

NOTE:

Do not connect the COAXIAL jack to an audio jack, for example an amplifier's CD input jack.

5 Synchronizing Clock Output Jack (GEN LOCK CLOCK OUTPUT-ST)

- For synchronized driving (ST GEN LOCK) with the separately sold DP-S1 CD Transport, connect as shown on the diagram using an ST Link™ type optical fiber cable.
- The jack includes a cap. Remove the cap, line up the protruding part of the jack with the guide groove in the connector, turn clockwise and insert securely until the cable is locked.

Input Jack Connections

1 Digital Input Jack (OPTICAL-ST) (CH-1)

- Connect as shown on the diagram using an optical fiber cable (ST-Link™ type), available in stores.
- The jack includes a cap. Remove the cap, line up the protruding part of the jack with the guide groove in the connector, turn clockwise and insert securely until the cable is locked.

2 Digital Input Jacks (OPTICAL-TOS) (CH-2 and CH-3)

- Connect as shown on the diagram using an optical fiber cable, available in stores.
- The jack includes a cap. Remove the cap, then insert the cord securely so that it is locked.

3 Digital Input Jacks (COAXIAL-RCA) (CH-2 and CH-3)

- Connect as shown on the diagram using a coaxial 75 ohm RCA pin-plug cord, available in stores.

4 Digital Input Jack (COAXIAL-BNC) (CH-4)

- Connect as shown on the diagram using a coaxial cord with BNC type connectors, available in stores.

5 Digital Input Jack (BALANCE) (CH-5)

- Connect as shown on the diagram using a Canon connector (XLR type) cord, available in stores.

- 1: Common
- 2: Cold
- 3: Hot

NOTE:
Do not short circuit the hot or cold terminal with the common terminal

OPERATION PRECAUTIONS

• Optical fibers

The DA-S1 uses optical fiber transmission for digital input jacks channels 1 to 3 (CH-1 to CH-3), one of the digital output jacks and the GEN LOCK (LOCK OUT-PUT) ST jack. With optical fiber cables, light signals are transmitted along the inner core. Scratches on the tip of the plug or foreign objects in the receptacle could seriously hamper signal transmission.

If there is extra cable length, coil the cable into a wide loop behind the set. Never strongly bend the cable. Optical fiber cables must be connected to the connectors in a specific direction. For ST-Link™ cables, line up the protruding part of the jack with the guide groove in the connector.

Always hold on the plug when disconnecting the cable. Never pull directly on the cable.

• Volume level

The DA-S1 has a wide dynamic range. Be careful not to turn the volume on the amplifier up too high for example at the beginning of a piece when the level seems low, as the speakers may be damaged at sections where the volume level is high.

• Place of installation

Humming may occur if the DA-S1 is installed near a TV or other audio components or if their connection cords are nearby. If this happens, try setting the components or their connection cords in a different position. Also, noise may be heard in AM or FM broadcasts if the DA-S1 is turned on while listening to a tuner. If this happens, turn the DA-S1's power off.

TROUBLESHOOTING

Check the following once again before assuming there is a problem with the DA-S1:

- Are all connections correct?
- Is the DA-S1 being operated properly as described in the instructions?

If the set is not operating properly, check as shown on the table below. If this does not solve the problem, the DA-S1 may be malfunctioning. Turn the power off immediately and contact your store of purchase.

Symptom	Cause	Refer to:
No sound is produced, or sound is distorted.	Output cord is not properly connected to the amplifier. Amplifier controls and switches not properly set.	Pages 10 to 13

INSTALLATION PRECAUTIONS

This D/A converter uses a microcomputer for controlling internal electronic circuits. In the event that the converter is used while a nearby tuner or TV is turned on, although unlikely, interference could occur either in the sound from the tuner or the picture of the TV. To avoid this, please take the following precautions.

- Keep the D/A converter as far away from the tuner or TV set as possible.
- Keep the power cable and connecting cable of the D/A converter separate from the antenna wires of the tuner and TV.
- Interference is particularly likely to occur when an indoor antenna or a 300-ohm feeder cable is used. Thus, use of an outdoor antenna and 75-ohm coaxial cable is strongly recommended.

300-ohm feeder cable

75-ohm coaxial cable

NOTE FOR PARTS LIST

- Part indicated with the mark * are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "1" and "1" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "*" is not illustrated in the exploded view.
- Not including Carbon Film $\pm 5\%$, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

WARNING:

Parts marked with this symbol  have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

● Resistors

Ex.:	RN	14K	2E	182	G	FR
	Type	Shape and performance	Power	Resistance	Allowable error	Others

RD : Carbon	2B : 1/8W	F : $\pm 1\%$	P : Pulse-resistant type
RC : Composition	2E : 1/4W	G : $\pm 2\%$	NL : Low noise type
RS : Metal oxide film	2H : 1/2W	J : $\pm 5\%$	NB : Non-burning type
RW : Winding	3A : 1W	K : $\pm 10\%$	FR : Fuse-resistor
RN : Metal film	3D : 2W	M : $\pm 20\%$	F : Lead wire forming
RK : Metal mixture	3F : 3W		
	3H : 5W		

• Resistance

1 8 2 $\Rightarrow$ 1800 ohm = 1.8 kohm
Indicates number of zeros after effective number.
2-digit effective number.

• Units: ohm

1 R 2 $\Rightarrow$ 1.2 ohm
1-digit effective number.
2-digit effective number, decimal point indicated by R.

• Units: ohm

● Capacitors

Ex.:	CE	04W	1H	2R2	M	BP
	Type	Shape and performance	Dielectric strength	Capacity	Allowable error	Others

CE : Aluminum foil electrolytic	0J : 6.3V	F : $\pm 1\%$	HS : High stability type
CA : Aluminum solid electrolytic	1A : 10V	G : $\pm 2\%$	BP : Non-polar type
CS : Tantalum electrolytic	1C : 16V	J : $\pm 5\%$	HR : Ripple-resistant type
CO : Film	1E : 25V	K : $\pm 10\%$	DL : For charge and discharge
CK : Ceramic	1V : 35V	M : $\pm 20\%$	HF : For assuring high frequency
CC : Ceramic	1H : 50V	Z : $\pm 80\%$	U : UL part
CP : Oil	2A : 100V	-20%	C : CSA part
CM : Mica	2B : 125V	P : $\pm 100\%$	W : UL-CSA type
CF : Metallized	2C : 160V	-0%	F : Lead wire forming
CH : Metallized	2D : 200V	C : $\pm 0.25\text{pF}$	
	2E : 250V	D : $\pm 0.5\text{pF}$	
	2H : 500V	= : Others	
	2J : 630V		

• Capacity (electrolyte only)

2 2 2 $\Rightarrow$ 2200 μF
Indicates number of zeros after effective number.
2-digit effective number.

• Units: μF .

2 R 2 $\Rightarrow$ 2.2 μF
1-digit effective number.
2-digit effective number, decimal point indicated by R.

• Units: μF .

• Capacity (except electrolyte)

2 2 2 $\Rightarrow$ 2200pF = 0.0022 μF
(More than 2) — Indicates number of zeros after effective number.
2-digit effective number.

• Units: μF .

2 2 1 $\Rightarrow$ 220pF
(0 or 1) — Indicates number of zeros after effective number.
2-digit effective number.

• Units: pF.

• When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

WARNING :

- Parts marked with "▲" and/or shading have special characteristics important to safety.
Be sure to use the specified parts for replacement.
- Part indicated with the mark "●" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.

SPECIFICATIONS

- **Audio**
 - No. of channels: 2 channel
 - Frequency response: 2~20,000 Hz $\pm$ 0.2 dB
 - Dynamic range: 100 dB
 - Signal-to-noise ration: 120 dB
 - Harmonic distortion: 0.0015%
 - Separation: 120 dB (1kHz)
 - Output voltage: Unbalanced: 2.5 Vrms/10 kohm load
Balanced type: 2.5 Vrms/10 kohm load
- **Digital input signal format**
 - Format: Digital audio interface
 - **OPTICAL-ST**
 - Acceptable laser power: -30 dBm or greater
 - Acceptable laser wavelength: 875 nm
 - **OPTICAL-TOS**
 - Acceptable laser power: -27 dBm or greater
 - Acceptable laser wavelength: 660 nm
 - **COAXIAL-RCA:** 0.5 Vp-p/75 ohm
 - **COAXIAL-BNC:** 0.5 Vp-p/75 ohm
 - **BALANCE:** 5.0 Vp-p/110 ohm
- **Digital output signal format**
 - **OPTICAL-TOS**
 - Peak optical power: -15 dBm ~ -21 dBm
 - Acceptable laser wavelength: 660 nm
 - **COAXIAL-RCA:** 0.5 Vp-p/75 ohm
 - **GEN LOCK CLOCK**
 - **OUTPUT-ST**
 - Peak optical power: -16 dBm or greater
 - Acceptable laser wavelength: 875 nm
 - Signal format: 16.9344 MHz (384fs), Duty 50% clock
- **General**
 - Power Supply: 60 Hz, voltage is shown on rating label
 - Power Consumption: 28 W
 - Dimensions: 434 (W) $\times$ 141 (H) $\times$ 419 (D) mm
(17-3/32" $\times$ 5-35/64" $\times$ 16-1/2")
 - Weight: 20 kg (44 lbs 2 oz)

*Design and specifications are subject to change without notice in the course of product improvement.

DISASSEMBLY

1. Top Cover

- ① Remove 6 screws from Top Cover.
- ② Detach the Top Cover as per the arrow shows.

2. Side Panel

- ① Remove 12 screws from both Side Panel.
- ② Detach the Side Panels as per the arrow shows.

NOTES

ALL RESISTANCE VALUES IN OHM. k=1,000 OHM.
M=1,000,000 OHM
ALL CAPACITANCE VALUES IN MICRO FARAD.
P=MICRO-MICRO FARAD
EACH VOLTAGE AND CURRENT ARE MEASURED AT
NO SIGNAL INPUT CONDITION.
CIRCUIT AND PARTS ARE SUBJECT TO CHANGE
WITHOUT PRIOR NOTICE.

WARNING:

Parts marked with this symbol  have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

CAUTION:

Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamps, or if the resistance from chassis to either side of the power cord is less than 240 kohms, the unit is defective.

WARNING:

DO NOT return the unit to the customer until the problem is located and corrected.
